The Demand for the Ideal is increasing

The adoption of engines for all farm work is rapidly increasing, and the demand will still further increase as the public becomes better acquainted with the many advantages they possess, for they are more economical and convenient than farm hands.

The Ideal hopper-cooled farm engine is the best farm engine at its price on the market to-day. It is so simple in operation and construction that a boy can soon learn to master it, and it will pay for itself in a few seasons' use with the fuel it doesn't burn.

Call to-day and see one in operation, or get our free catalog.
